

Name: _____

Period: _____

Designing Your Own Imaginary Continent

Part 1: Design your own continent similar to Continent Reese

You must include the following in your design:

- a. Latitudes from 90 N through the equator to 90 S.
- b. At least two mountain ranges (one coastal and one in the interior of the continent)
- c. At least 2 major rivers (one of which can flow to the ocean and another which should be in the interior of the continent)
- d. Name your continent and your mountains and rivers

Part 2: Add at least 8 cities to your continent each with their own unique climate. Label your cities with either letters, numbers, or names

You must include the following in your design:

- a. One interior
- b. One coastal
- c. One high altitude (in mountains)
- d. One at sea level
- e. One near the equator
- f. One near a pole
- g. One windward of a mountain
- h. One leeward of a mountain

Part 3: In the space below, create a series of questions for someone to answer based on your continent and its various locations (for examples, see Continent Reese homework).

Question 1: _____

Answer 1: _____

Question 2: _____

Answer 2: _____

Question 3: _____

Answer 3: _____

Question 4: _____

Answer 4: _____

Question 5: _____

Answer 5: _____

Question 6: _____

Answer 6: _____

Question 7: _____

Answer 7: _____

Question 8: _____

Answer 8: _____

Question 9: _____

Answer 9: _____

Question 10: _____

Answer 10: _____

Part 4: Now you will share your continent with a partner and they will answer the questions you created based on the different locations and climates of your continent; check their answers when finished.

Partner Name: _____

Score: ____ / 10

Continent _____
