

Name: _____

Period: _____

Instaganelles ... What would organelles say if they had an Instagram?

Directions: For each organelle, first draw a profile picture in the small circle next to the organelle's Instagram name. Then, create a name for the organelle's account and write it in the space next to the profile picture. Next, draw the "selfie" photo that the organelle posted on Instagram. This should be a sketch that looks like the organelle, but it can be cartoonish or personified. Lastly, write a caption for the picture. The caption should describe the function of the organelle. In your caption, you must use at least one #hashtag and one emoji. 🤪
