

## Help the fox get home worksheet

You need to be very specific in programming; this is an exercise to demonstrate that. This fox needs to get home, but cannot bump into any obstacles (the ball, the rocks, the bell). Use detail to explain how the fox would get home. `_` is the distance of one step.

## Answer Key

Answers may vary, but the main idea is that many specific steps may be needed to perform a simple task in programming.

The fox points right and moves 15 steps. The fox points up and moves 8 steps. The fox points right and moves 5 steps.
