

Sort the following examples of radiation, convection, and conduction into the columns below:

1. The sun shines on you through a window in your home. **radiation**
2. You drink a cup of hot apple cider and it warms your throat. **conduction**
3. You hold a bowl of hot soup that warms your hands. **conduction**
4. Hot air from the heater warms the air above it. **convection**
5. Light from a lamp shines on you and warms you up. **radiation**
6. A pot of food gets heated up by sitting on a hot burner. **conduction**
7. Steam from a hot bowl of soup warms your face as you lean over it. **convection**
